**Bioretention Tree Well with trash capture**

*Diagram showing the components of a bioretention tree well:*
- Tree Well
- Filtered Rainwater
- Root Zone
- Bioretention Area
- Stormwater Inlet

*Description:*
Combining trash capture and bioretention, the tree well reduces pollutants where space is limited. After trash is captured by a screen, stormwater enters the bioretention area where the bioretention soil media filters out pollutants. Stormwater not used by the bioretention area infiltrates into the ground or enters the storm drain system through a perforated underdrain.
Outstanding Sustainable Stormwater Project or Program

San Francisco Public Utilities Commission for the Green Infrastructure Grant Program
Outstanding Sustainable Stormwater Project or Program

City of Livermore
City of Pleasanton
